## SPA MOVING

- \$120 per hour with a 2-hour minimum
- **This price includes up to 25 miles from one location to the other--anything further out will be charged at \$1.00 per mile**
- **Clear a path from the hot tub's current location to where our truck will be loading it. Make sure there is nothing on the ground to cause someone to trip, fall or drop the hot tub. Ensure all openings are wide and tall enough for the tub to fit through. (Tub will be brought out on its side which is usually 36 inches or less)**
- **The hot tub MUST be disconnected from its source of electricity. You must disconnect the hot tub or have an electrician do it. You can call us prior to arrival and we can talk you through the process, but you must do it yourself.**
- **The spa should be drained prior to arrival. However, we can do that but it will end up adding additional expense due to the time factor.**
- **If the job requires a 3rd man it will be an additional \$50.00 an hour.**
- **For difficult moves that may require a crane or special factors such as obstacles and such, we can come out first for a small inspection fee of \$45.00**
